

Dear members of the Operational Safety Community,

We would like to have your opinion on one of our safety tool, namely “BeforeYourFlight”, which is dedicated to the pre-flight risk assessment process.

As you all know, our number one objective is to support your daily operations by proposing some efficient solutions taking into account the mission specificities.

Therefore, we have developed this new app available for both apple and android devices.

Questions to the members of the community :

Have you ever heard about “Before your flight” ?

What do you think and what could we do differently to increase the performance of the tool ?

Do not hesitate to propose any modification or to comment any functionality.

Ray Hsu / Stéphane Morel
